## II. Modernizing the Digital Backbone of BIR

Building and adoption of digital infrastructure that would facilitate the integration of digital technology in all areas of tax administration to continuously improve internal and external services

Internal Revenue Integrated System (IRIS)

Establishment of Command Center

Enterprise Architecture

Cybersecurity Policies and Tools

Cloud Computing Provisioning

Use of modern tools (development tools, big data tools)***

Use of collaboration tools for Digital Workplace***

Application Programming Interface (API) for BIR eServices and API Management Tool

*** Optimize the use of Office 365 and SAS licenses
